A02:2021 Cryptographic Failures	1	-20.0

Detailed Findings

[CRITICAL] API base URL uses unencrypted HTTP

Endpoint: N/A (base URL) **OWASP:** A02:2021 Cryptographic Failures **Module:** transport_security_tests

Description: The configured base URL (http://127.0.0.1:9000) uses http:// rather than https://.

Impact: All traffic — including bearer tokens and request/response bodies — travels in plaintext and can be intercepted or modified in transit.

Recommendation: Serve the API exclusively over HTTPS/TLS 1.2+ and redirect all HTTP traffic to HTTPS.

Generated by AegisLab — automated, non-destructive API security testing for developer-owned systems only.
